EUROPE'S LEADING SPECIALIST
SUPPLIER OF AIR AND FLUID
HANDLING PRODUCTS

INDUSTRY LEADING PRODUCTS COMBINED WITH MORE THAN 200 YEARS' KNOWLEDGE & EXPERTISE

High quality installation

We have a team of electricians, pipefitters, pumps and compressor engineers with the knowledge and experience to specify, supply and install equipment, from a single pump to an entire factory air supply.

Fully fitted vehicles carry all the tools required and we can even supply a mobile compressed air service to allow continued operation for a plant whilst we undertake new and replacement installations.

Service & Support

Our fleet of service vehicles and qualified mobile engineers is available 24 hours a day, seven days a week, allowing us to react quickly to the needs of the customer.

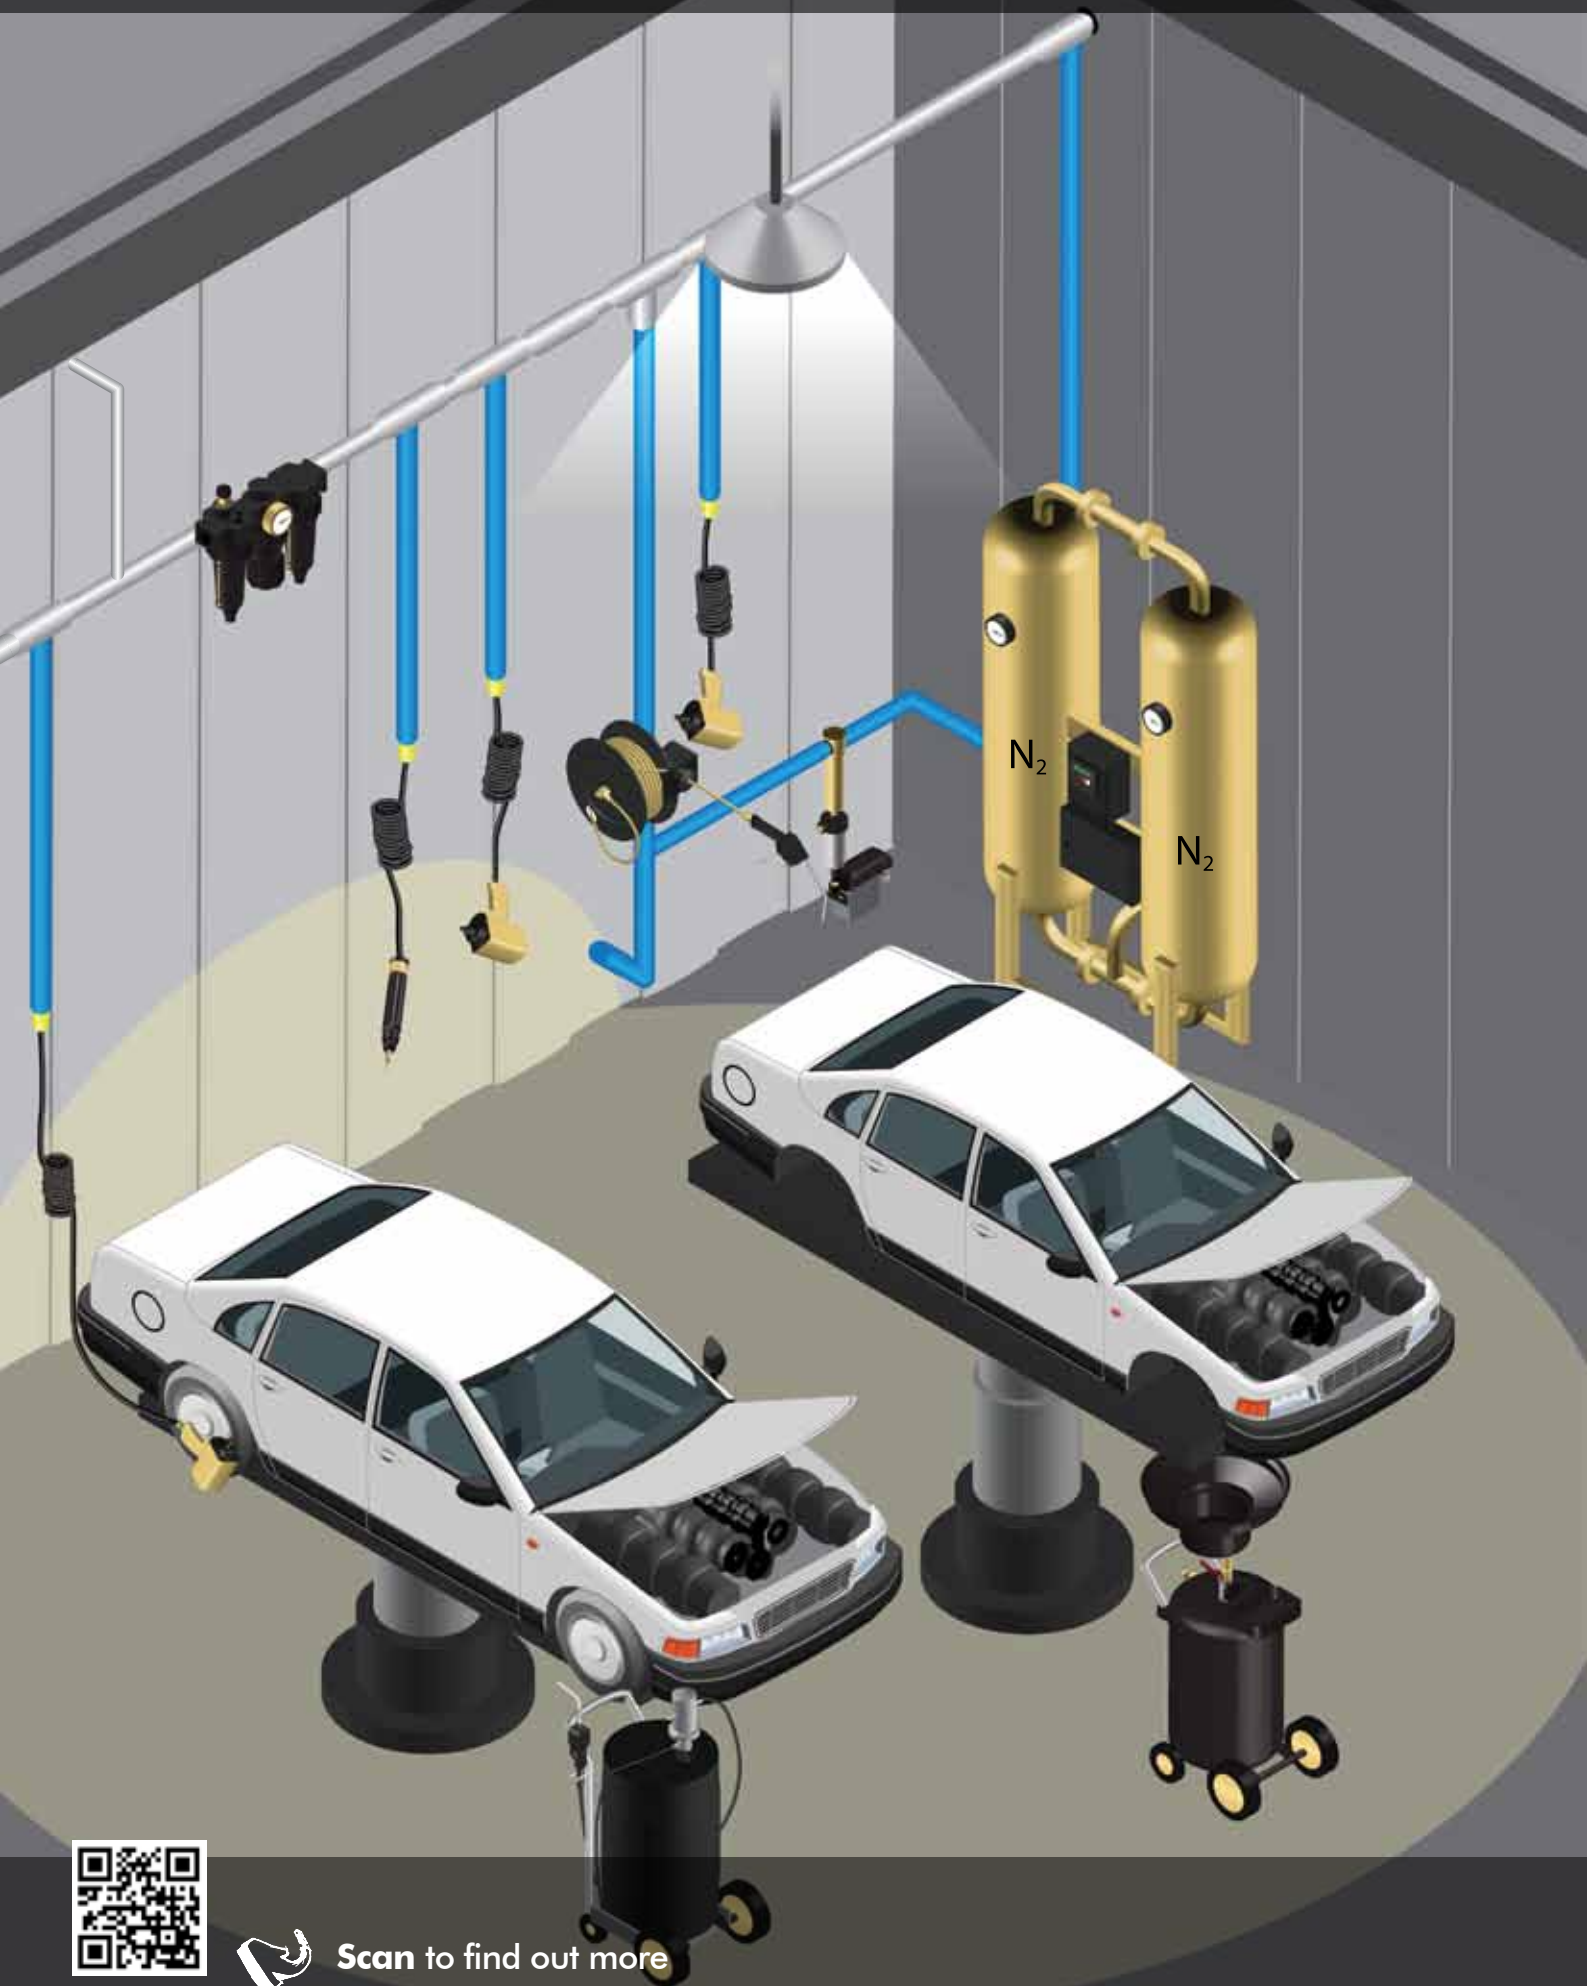

With the ability to come to site with all the required tools and fittings, and vehicles fitted with compressed air generators, we are the fourth emergency service.

Platinum Distributor and Official Service Centre, ARO the group's servicing of air compressors, pumps, air tools.

Diaphragm Pumps Ireland

Diaphragm Pumps Ireland is a major player in the Irish market, working across the semiconductor, pharmaceutical, veterinarian, chemical, food and agricultural processing industries.

Committed to supplying quality products, after-sales support, and know how at competitive prices, Diaphragm Pumps Ireland is set to become the market leader.

Diaphragm Pumps Inc.

The latest addition to the group is based in North America and expedites products from American manufacturers to avoid long lead times from European distribution hubs.

Diaphragm Pumps Inc. ships weekly and offers improved service levels, which is the core of our business ethic. The new American business also provides an opportunity to promote European manufactured products to the American market.

GE IS SPECIFIED BY WORLD-CLASS ACROSS MANY SECTORS.

Our products make DP Group of Companies

Marine and Shipping

From bilge pumps to oil and grease transfer, our compressors supply power to pumps and engine starters.

Oil and Gas

Suppliers of bund and spill pumps, pumps for chemical transfer, drilling mud & corrosion inhibitors, compressed air systems and air starters.

Petrochemical

Our compressors, air tools and pumps are used for chemicals including polybutene and ethanol. We also provide ATEX approved equipment for fuel transfer.

Pharmaceutical

Transferring creams, ointments and lotions, our extensive range of pumps, compressors and nitrogen generators support EHEDG, 3A, USDA & FDA.

Power and Energy Generation

Our compressors, starters and air tools are used with bio-fuels and methanol for everything from the simple transfer of rainwater to lubrication systems for turbines.

Refinery

We provide compressed air for jet washers and pumps suitable for chemical sampling, bitumen and diesel transfer.

Sanitary Applications

Cream cheese, beer and mayonnaise are just a few of the products transferred hygienically using our products. Wash down stations and nitrogen generators supplement our portfolio.

Transportation

Compressed air and nitrogen generation for tyres. Pumps for waste oil, hydraulic fluids and wash down.

Water and Waste

We provide compressors and portable air supplies for effluent transfer, water reclamation and leachate removal pumps.

“ A wide range of industry leading products in-stock and ready for same day dispatch. ”
